## Certificate of conformity with EU requirements regarding contact with foodstuff

Product: Water canister volume  
5,10, 15, 20 liters

Declaration date: 02.06.2020

Monomers and supplements used in the production of this product are mentioned in the Decree WE 10/2011 (as well as in the substitutive legislation; Commission Directive 2002/72/EC (06/08/2002), about materials from plastic and articles dedicated to contact with foodstuff and the amendment to this Directive 2004/1/EC (06/01/2004), 2004/19/EC (01/03/2004), 2005/79/EC (18/11/2005), 2007/19/EC (30/03/2007), 2008/39/EC (06/03/2008) as well as decree WE) nr 975/2009 (19/10/2009)), within the limits defined in Decree 1935/2004/EC (27/10/2004) about materials and articles dedicated to contact with foodstuff and Directives repealing 80/590/EEC i 89/109/EEC.

Above work has been tested **independently** in terms of organoleptic testing of it's content as well as global migration with use of simulating factors mentioned above and in the testing conditions based on Directive 97/48/EC as well as decree WE 10/2011. Product was treated with simulating factor action in tested conditions.

| Factor simulating food | Testing conditions |                  |                        |
|------------------------|--------------------|------------------|------------------------|
|                        | Duration           | Temperature (°C) | Result                 |
| Distilled water        | 10days             | 40               | 0,46 < 2,00            |
| Spring water           | 10days             | 40               | smell - 0<br>taste - 1 |

It was alleged that the results of the general migration are lower than the limit value defined in the Directive 2002/72/EC and Decree WE 10/2011 that is currently 10 mg/dm<sup>2</sup> surface area of the product.
